

CULTURE AND HUMAN BEHAVIOR

ADI FAHRUDIN, PhD

(Associate Professor)

Bandung School of Social Welfare

Ecosystem perspective

- Ecosystem perspective can help social workers arrange, integrate, and systematize knowledge about how people interrelate with each other and with their environments (Pillari, 1993)

Budaya dan Sosialisasi

- Sosialisasi : the process by which an individual becomes a member of a particular culture and takes on its values, beliefs, and other behaviors in order to function within it
- Elkin & Handel (1989), it this process that “helps to explain how a person becomes capable of participating in society....(as well as)...how society is possible at all (p.4)

Contd.

- Melalui proses sosialisasi, masyarakat mengajarkan perilaku yang “*desirable*”, menyiapkan individu untuk menjadi anggota yang berfungsi secara berhasil dalam (keluarga, sekolah, masyarakat dan tempat kerja) dan menjamin bahwa tradisi-tradisi penting (dengan beberapa modifikasi) akan menjadi bagian dari anggota-anggota tersebut di masa mendatang

Physical & social settings of daily life

- Objects, toys, reading materials
- Ecological setting and climate
- Family structure
- Presence of multiple generations
- Presence or absence of mother or father
- Role of siblings as caretakers

Customs of child care and child rearing

- Sleeping pattern (e.g. co-sleeping vs. sleeping alone)
- Dependence vs. independence training
- Feeding and eating schedules
- Handling and carrying practices
- Play and work patterns
- Initiation rites
- Formal vs. informal learning

Psychology of the caretaker

- Parenting styles (e.g., authoritarian, authoritative, laissez-faire)
- Value systems (e.g., dependence, independence, interdependence)
- Parental cultural belief systems or ethno-theories
- Developmental expectation

Some Cultural Variations in the Socialization of Behavior

- Infancy : Sleep, Feeding, Crying
- Childhood : Aggression, Formal vs. informal learning
- Adolescence : Rites of passage

Aspek Budaya dari Pertumbuhan dan perkembangan fisik

- The Prenatal Period
- Infancy and Early Childhood; pertumbuhan dan perubahan fisik, motor skill development, play and physical development,
- Middle Childhood; childhood obesity, refining motor skill
- Adolescence: menarche,
- Early and Middle Adulthood : Menopause
- Later Adulthood : senescence, cultural images of aging,

Budaya, Bahasa dan Kognisi

- Cognition : as the act or process of obtaining knowledge, including perceiving, recognizing, reasoning, and judging (Gander & Gardiner, 1981)
- Language : a system of symbols that is used to communicate information and knowledge

Kaitan Bahasa-Kognisi-Budaya: Sebuah Renungan ?

- *Do people who speak different languages think about and experience the world differently ?*

Kaitan Budaya, Self, dan Kepribadian

- Temperament and “goodness of fit”
- Childhood and Self concept
- Individualism and collectivism

Pandangan Budaya Mengenai “the Self” as a person

- Self concept : the perception of oneself as a person with desires, preferences, attributes, and abilities
- How we think about ourselves from how we feel about ourselves
- Self concept >>>self esteem

Remaja: Memasuki Dunia Orang Dewasa

- Identity formation
- Body Image
- Social Clocks

Budaya, Isu Sex dan Gender

- Sosialisasi gender
- Pengaruh budaya pada sosialisasi lelaki dan perempuan
- Violence against women
- Gender relationship
- Marker of sexual maturation
- Sexual activity and cultural taboo
